WORLD LEADING PRODUCT INNOVATION

BRUSHLESS

OVER A DECADE AGO, MAKITA® CREATED BRUSHLESS MOTOR FASTENING TOOLS for assembly applications in the defense and aerospace industries, and in 2009 delivered the industry's first 18v brushless motor impact driver to contractors. Makita® BL[™] Brushless Motor Technology **provides up to 50% longer run time, increased power and speed and longer tool life.**

GLOBAL

It all started with the motor over 100 years ago. Makita[®] Corporation was founded in 1915 as an electric motor sales and repair company. Today, as a global brand in over 40 countries, Makita[®] is an innovation leader, manufacturing best-in-class products at 10 plants operating in 8 countries. The unmatched quality and durability of Makita[®] products is driven by the company's strong R&D capabilities, and have earned the trust of professional users worldwide. Every day, on jobsites around the world, Makita[®] delivers the power, performance and durability that professional users demand with products that are more compact, have less vibration and feel better.

U.S.A.

Makita[®] Corporation of America is located in Buford, Georgia. As a part of our global network of ten manufacturing and assembly plants, Buford is one source of Makita[®] products used on jobsites around the world. Our product development team works closely with engineers on jobsites to develop products that exceed the demands of the American contractor. Buford, Georgia is also the site of the Makita[®] University, a hands-on educational experience where customers learn the latest technologies, products and applications.

QUALITY

High-Strength Steel

is used to manufacture gears and armature shafts, and graded to the highest industry standards

97% Pure Magnetic Copper Wire

delivers efficient current flow, and is engineered to withstand extreme temperatures for maximum power and longer life

Jobsite-Proven Lithium-Ion Battery Cells are engineered for industrial performance and longer life

EXPERIENCE

Over 100 Years of Designing and Building Motors Highest Quality Raw Materials More Power and Less Weight in a Compact Size Rigorous Quality Control Standards Built for Industrial Jobsite Demands

SELF-LEVELING COMBINATION CROSS-LINE/POINT LASER All-In-One Solution: Combination

Cross-Line/Point Laser

- · Provides all possible reference lines required in leveling, aligning, plumbing, and squaring applications for maximum versatility
- Accuracy horizontal/vertical lines (+/- 1/8" @ 30'); points (+/- 1/8" @ 30')
- Pendulum lock offers added protection of laser diode during transport and enables slope incline applications for increased versatility

 Laser line fan length spans well past 90° point position to provide 180° horizontal line and 120° vertical line

FOR ALL YOU GAS POWERED EQUIPMENT

ADVANTAGES

Get lower emissions, less noise and reduced operating costs.

Makita 4-stroke engines have measurably lower emissions and noise than traditional 2-stroke engines.

Lower fuel consumption at .45 gallons per hour.

Reduced exhaust and intake carbon build-up for longer cylinder life.

EK6101

14" 61 cc POWER CUTTER Compact Performance at Only 19.6 lbs

with 4.4 HP/61 cc Engine

- · Stratified Air Scavenging (SAS) recovers 75% of unburned fuel and reduces fuel consumption by 20%
- Cyclonic air Intake delivers more air, more efficiently and increases air filter life by discarding 90% of larger debris
- · Start capacitor with spring assisted recoil stores electrical energy resulting in significantly less pull start force
- · Sliding front engine mounts help absorb vibration by detaching when cutting pressure is applied
- · Smaller hub and drive wheel assembly increases maximum cutting depth to 5-1/8"

Model EK6101 Includes: Universal Wrench (941-719-140), Torx Wrench (940-827-000), Carburetor Screwdriver (944-340-001), Adapter Ring (20mm to 1") (315-228-120)

ADVANTAGES OF MAKITA HIGH PRESSURE

MORE POWER

High pressure compressor technology delivers 400 PSI

LESS WEIGHT

Nailers are up to 30% less weight than conventional nailers

BETTER PERFORMANCE

Dual-head (2-stage) pump compressor provides faster recovery time

INCREASED EFFICIENCY

Low amp draw reduces tripped breakers and voltage drop during start-ups

MORE POWER MORE CONSISTENCY Thakita 🤪

Conventional Nailers ĩ . Engineered Material Drive larger nails (3-1/2" x .162" size) more consistently in engineered materials

AC310H

2.5 HP* HIGH PRESSURE **AIR COMPRESSOR** High Pressure Technology Delivers

400 PSI Capacity

- · Dual capacity: two universal couplers for conventional nailers and two couplers for high pressure nailers
- · Low amp draw reduces incidences of tripped breakers and voltage drop during start-ups
- · Efficient dual-head (2-stage) pump provides faster recovery time and improved performance
- Pump runs at lower RPM (1,720) resulting in lower noise and improved pump durability

Premium Hammer Cart

MAXIMUM EXTRACTION

Durable Construction for use on the Most Demanding Jobsites

Applications

Attaches to 1-1/8" demo bit 1" to 4" from the surface being demolished for efficient dust extraction

Convenient hose holders keep the hose out of the way during use

197172-1

1-1/8" HEX SHANK DUST EXTRACTING ATTACHMENT

- · Large opening allows for maximum dust extraction
- · Durable plastic construction for long life
- Includes hose and hose holders
- For use with demolition hammers that utilize 1-1/8" hex shank bits

CONVENIENT TRANSPORTATION

Conveniently Transports Breaker Hammers and Bits on the Jobsite

(4) 1-1/8" demolition steel bits

Stair climber rails for convenient lifting up stairs, curbs, truck beds, and other elevated surfaces

Durability

Rugged 9" semi-pneumatic wheels roll smoothly through rough jobsite terrain

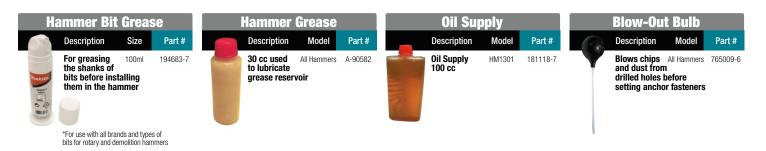

Adjustable strap keeps hammer securely fastened to the cart during transportation

T-02892

PREMIUM HAMMER CART

- . For use with 1-1/8" hex shank Breaker and **Demolition Hammers**
- (HM1307CB, HM1317CB, HM1500B, HM1810, HM1812) · Ball bearing hubs allow the wheels to rotate quickly and smoothly
- Corrosion resistant coating adds a layer of protection against harsh elements
- · High-quality steel for long life

Drill Bits

Self Feed Bits

- · Used by plumbers, electricians and other tradesmen for boring holes for pipe and conduit in wood
- · Outlining spurs accurately define hole diameter · Threaded screw point pulls the bit into the work providing a fast, easy to use self feeding action
- · Heavy duty 1/2" shanks have 3 milled flats for secure fit

Double ended screw point for bit 3-5/8" to 4-5/8"

Keyless Chuck Attachment

Description

· Converts 1/4" hex impact driver into a 3/8" keyless chuck · Designed to accept round and hex shank bits · For converting an impact driver into a driver drill

Part #

763198-1

Converts 1/4" hex impact driver into 3/8" keyless chuck

High Speed Steel Step Bits

 Drills perfectly round holes in materials such as steel, brass, plastic, and wood · Ideal for knockouts in electrical junction boxes and cabinets

· Efficiently enlarges and deburs holes

Cobalt center bit ideal

for use in metal including stainless steel, galvanized iron and aluminum

. 1/4" hex shank works directly with impact drivers and driver-drills

FASTER MATERIAL REMOVAL Less Noise. Less Vibration. Improved Efficiency.

- Aggressive composition for faster material removal
- · Innovative design for reduced noise
- · Reduced vibration for superior user experience
- "N" grade hardness is ideal for working with stainless steel

Warning: Consult owner/operator manual and adhere to all safety precautions for accessory items. Always use recommended guards. Failure to do so may result in serious injury or death from exploding wheels. Refer to ANSI B7.1 and owner/operator manual for proper accessory mounting and grinding procedures. Always wear eye protection that meets ANSI 287.1 requirements plus a face shield wherever possible. Tools must always be properly guarded.

Trade Associations

Makita U.S.A., Inc., is an associate member of the following trade and standards associations:

Instruction Manual

For your safety and best optimum tool performance, be sure to read, understand, and follow all the safety and operating procedures listed in the instruction manual before connecting your tool to a power source. An instruction manual is furnished with every Makita tool. If yours is lost, stay safe! Contact the nearest Makita Sales Office/Distribution Center for a replacement, or visit makitatools.com.

Double Insulation

Most Makita tools do not require 3-prong "grounded" plugs because they are "DOUBLE INSULATED". Double insulated tools protect the user by two independent insulation systems. These systems shield the electric motor components from the outer motor housing and gripping areas of the tools. All Double Insulated Makita power tools are denoted by the double square safety mark.

Units of Measurement

Amp Hour: (Ah) The standard measure of capacity for a rechargeable battery. The quantity of electricity that passes through a circuit in one hour when the rate of flow is one ampere.

Watt Hour: The practical unit of energy capacity. Equal to the battery voltage multiplied by the amp hours of that battery.

Maximum Watts Out: An accurate unit measurement of power from an electric motor. One watt equals the amount of power required to maintain a current of one ampere at a pressure of one volt.

Vibration: (m/s2) measurements are made in the direction of feed force and with three axes of a basicentric co-ordinate system. Measurements shall be carried out at a point halfway along the length of the handles or where an operator normally holds the tool. If the placing of the switch actuator makes this impossible then the accelerometer is placed as close as possible to the hand between the thumb and the index finger.

Joules: (J) The basic unit measuring impact energy. Equal to the amount of work done by force of one Newton acting through a distance of one meter in the direction of the force.

Newton Meters: (N•m) A unit of the meter-kilogram-second system equal to the energy expended, or work done, by a force of one newton acting through a distance of one meter and equal to one joule. N•m \rightarrow ft.lbs., multiply by .7380.

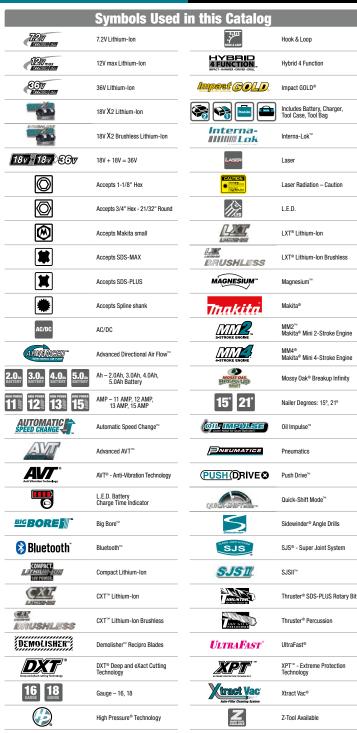

EPTA Standard for Stated Net Weight Values: Makita Industrial Power Tools are weighed in accordance to standards set by the European Power Tool Association (EPTA). In catalogs, the attribute is designated as weight without the cord, and for cordless products as weight including batteries, unless otherwise noted.

Safety Precautions

Read, understand and follow all instructions and warnings in tool or charger instruction manual as well as those provided with recommended accessories.

Keep guards in place and in working order. Use recommended accessories only.

Check damaged parts. (Before further use of the tool, a guard or other part that is damaged should be carefully checked to determine that it will operate properly and perform its intended function). A guard or other part that is damaged should be properly repaired or replaced by an authorized service center.

Keep work area clean. Cluttered areas and benches invite injuries. Consider work area environment. Do not use power tools in damp or wet locations. Keep work area well lit. Do not expose power tools to rain. Do not use tools or chargers in presence of flammable liquids or gases.

Keep children away. All visitors should be kept away from work area.

Store idle tools. When not in use, tools should be stored high or locked up out of reach of children.

Use the right tool. Do not force a small tool or attachment to do the job of a heavy duty tool. Do not use tool or accessories for purpose not intended. Only use proper, recommended accessories for the tool being used. Only use genuine Makita® batteries and chargers

Dress properly. Do not wear loose clothing or jewelry. They can be caught in moving parts. Wear protective hair covering to contain long hair.

Use safety glasses whenever operating any tool. Makita® safety goggles and glasses are available (part no. 191686-2, 191684-A and 191685-A). Also use face or dust mask if operation is dusty.

Don't abuse cord. Never carry tool by cord or yank it to disconnect from receptacle.

Secure work. Use clamps or a vise to hold workpiece. It can be safer and it frees both hands to operate and control tool.

Maintain tools with care. Keep tools sharp and clean for best and safest performance. Follow instructions for lubrication and changing accessories.

Un-plug tools. When not in use, before servicing, and when changing accessories. Remove adjusting keys and wrenches. Form a habit of checking to see that keys and adjusting wrenches are removed from tool before turning it on.

Avoid unintentional starting. Don't carry plugged-in tool with finger on switch. Be sure switch is OFF when plugging in.

Outdoor use extension cords. When tool is used outdoors, use only extension cords intended for use outdoors and so marked.

Guard against electric shock. Prevent body contact with grounded surfaces. For example: pipes, radiators, ranges and refrigerator enclosures.

Replacement parts. When servicing, use only genuine Makita® replacement parts.

Never leave tool running unattended. Turn power off. Don't leave tool until it comes to a complete stop.

"KNOCK-OFF" MAKITA® LITHIUM-ION BATTERIES MAY BURST CAUSING FIRES, PERSONAL INJURIES OR PROPERTY DAMAGE

CAUTION MAKITA® U.S.A., INC. NOTIFIES TOOL USERS OF THE HAZARDS AND RISKS OF USING NON-GENUINE ("KNOCK-OFF") MAKITA LITHIUM-ION BATTERIES.

Makita[®] Lithium-Ion batteries are manufactured to strict standards, and are engineered with internal electronic circuitry to monitor the battery conditions when in use with Makita[®] tools and chargers. By using a non-genuine Makita[®] "knock-off" battery or batteries that have been altered, the sophisticated electronic communication system between the battery and charger as well as between the battery and the tool may be defeated. This will result in:

- Voiding the Makita® Warranty for the Makita® tool and charger
- · Voiding the UL/CSA Standards approval of the tool

When using non-genuine Makita® batteries, there is also a risk of:

- . The battery bursting that may result in personal injury and/or property damage
- Possible fire damage to the tool, the battery and/or the charger
- Unknown tool performance

Makita[®] bears no liability for accidents, personal injury or property damage (or damage to batteries, tools or chargers) that occurs as a result of the use of "knock-off" batteries, or batteries that have been repaired or altered in any way.

Don't be fooled! Genuine Makita[®] batteries are black in color, have the Makita[®] trademark logo with Lithium-Ion identification on both sides, and have the Makita[®] trademark logo on the bottom of the battery. "Knock-off" batteries may appear to be similar to genuine Makita[®] batteries but have no Makita[®] branding on them. Makita[®] only approves the use of genuine parts and accessories with Makita[®] tools. Makita[®] does not approve the use of non-genuine or "knock-off" Lithium-Ion batteries which are marketed and sold by third parties for use in Makita[®] Lithium-Ion cordless tools.

If there is any question whether your battery is a genuine Makita[®] product, or if you have a performance issue with your Makita[®] battery, tool, or charger, contact a Makita[®] Factory Service Center or Authorized Service Center, or call (800)4-MAKITA.

HM1812X3 70 Ib. Advanced AVT® Breaker Hammer

with 4-Pc. Steel Set & Hammer Cart, accepts 1-1/8" Hex bits

Powerful 15AMP Motor with improved hammer mechanism delivers over 50 ft. lbs. (68 Joules) of impact energy

Mechanical Counterbalance Stystem greatly reduces vibration and directs more impact energy to the work surface

Vibration Absorbing Housing

moves independently of the motor and hammer mechanism effectively isolating more vibration away from the user

Integrated Cord Guide helps position 16'4" power cord away from working area

Fixed Movement Handles for more control and greater accuracy

EK7651H 14" MM4® Power Cutter shown with optional premium diamond blade (T-02537)
